STATION NAME	COUNTY/CITY	AMOUNT	ENDING DATE	VALID DATE RANGE

Updated 2/14/2026

SOURCE: 1) Applied Climate Information System (ACIS): <https://scacis.rcc-acis.org/>
2) NOAA/National Centers for Environmental Information (NCEI): <https://www.ncdc.noaa.gov/IPS/coop/coop.html>
3) NOAA/NCEI - Climatological Data, Maryland & Delaware: <https://www.ncdc.noaa.gov/IPS/cd/cd.html>

NOTES: 1) This data table was created to show what can be expected in any 365-day period within the different parts of Maryland, not just by calendar year or snow season.

2) The data shown is taken from an ACIS database search and cannot account for any data entry issues. Some have been revised, where known, using the other sources shown above. Not all stations have been investigated for missing data, which could add more to the totals shown. Also note the Valid Date Range for each station - some have much shorter periods, which can have a much lower total than can be expected for those locations.

3) + indicates ending on more than one date.

4) Stations with blue backgrounds indicate the highest amount from combined stations from the same city/location. Date ranges are also combined for full period of record. The actual station which recorded the maximum amount has its full station name shown in parenthesis following the station name, if different from the basic city name.

5) In recent years, the National Centers for Environmental Information (NCEI) began accepting the Community Collaborative Rain, Hail, and Snow Network (CoCoRaHS) stations as official (after intense investigation of any potential state records). Though the following CoCoRaHS stations were not officially investigated, these were extreme maximum snow totals for a 365-day period but not included on the official station list, above:

- Friendsville 4.8 SW, Garrett County, 230.4 inches, 2009-12-19 to 2010-12-18+
- McHenry 4.8 SSE, Garrett County, 230.1 inches, 2009-12-19 to 2010-12-18

In comparison with these two CoCoRaHS stations, the McHenry COOP station's data for that same time period:

- McHenry 2 NW (COOP), Garrett County, 186.5 inches, 2009-12-19 to 2010-12-18 (only 1.0" lower than this station's all-time extreme of 187.5 inches, 1992-03-15 to 1993-03-14)
