SOURCE: Applied Climate Information System (ACIS): <https://scacis.rcc-acis.org/>

- NOTES:**
- 1) Official Stations are associated with the National Weather Service (NWS: WBAN and COOP), Federal Aviation Administration (FAA Airports: WBAN), and the U.S. Military Bases/Airports: WBAN.
 - 2) The Community Collaborative Rain, Hail, and Snow Network (CoCoRaHS) contains stations run mostly by general citizen observers and are not normally considered "official" by the National Weather Service (NWS) and National Centers for Environmental Information (NCEI). The veracity of this data cannot be verified beyond the CoCoRaHS observer entries and staff's review. If a potential state record is being considered and a CoCoRaHS station's data is within consideration, the various entities that make those decisions would become involved - National Weather Service, National Centers for Environmental Information, and the State Climate Extremes Committees. After interviewing the observer and reviewing the station's equipment siting, the data might then be considered official by NWS and NCEI.
 - 3) Most weather data is provided for monthly, annual or seasonal periods. These data tables cover any 30-day period, showing what can occur outside of a specific month of the year.
 - 4) Except for a few obvious errors in the database, most of the data in these tables has not been deeply scrutinized but is presented here anyway.
 - 5) + Indicates multiple occurrences on the date shown and earlier date(s).
