**NOTES:** 1) **Bold red** values indicate extreme Maximums, **Bold blue (Annual only)** for extreme Minimums.

2) *Italic values with this color background are current, incomplete periods and are not included in any calculations until that associated period is complete.*

3) This gray background indicates missing, incomplete, or future data and are not included in any calculations.

4) Due to large temperature and station siting differences between the former official stations in downtown Baltimore (10/1/1871-7/22/1950) and current official suburban station at BWI Airport (7/23/1950-Present) south of the city, the data, above, cannot truly be compared but all is included for a longer-term archive.

5) Minimum Temperature data of ≤32°F. for Baltimore is currently only available beginning in October 1871 and Maximum Temperature data of ≤32°F. back to July 1872. Research is still being done in an attempt to locate the Maximum and Minimum data back to January 1871.
