YEAR	MAXIMUM MONTHLY PRECIPITATION	MONTH	LOCATION	COUNTY	MINIMUM MONTHLY PRECIPITATION	MONTH	LOCATION	COUNTY	YEAR

Data through 4/30/2026; Updated 5/14/2026

DATA SOURCE: Climatological Data - Maryland/Delaware Annual Summaries and some monthly publications - 1891-2026: <https://www.ncdc.noaa.gov/data-access/quick-links#cdp>
Applied Climate Information System (ACIS) - 1891-1895, 2023-2026: <https://scacis.rcc-acis.org/>

1972 - Westminster (MSP) - Official but Unpublished Station - Source: Climatological Data - Maryland/Delaware, June 1972, Table 1, p. 65;
Published Westminster Monthly Total of 18.79" from 12/1972 CD, "Late Reports" p. 152.
1945 - Leonardtown July total from Climatological Data, MD-DE Section, July 1945, Vol. XLIX, #7, p. 1 Precipitation write up.

- NOTES: 1) Where a DC station equals or exceeds a MD extreme, the DC value is additionally shown (in pink).
2) Trace = Measurement of <0.01".
3) M = Missing one or more days of recorded precipitation.
4) E = Partially Interpolated data (either by Snow Water Equivalent or from surrounding stations' data).
5) AP = Airport.
6) MSP = Maryland State Police Barracks.
7) N/A = Insufficient stations available to determine.
8) Bolded values are extremes for the entire data period.
9) Italicized values in the current year are the extremes as of the most recent update.

- 10) Year 1891 only covers the 8-month period May-December for the Minimum Monthly Precipitation as only Baltimore data is available for January through April.
11) #The 2011 Minimum total of 0.73" at Princess Anne is missing data for February 5th. Nearby stations recorded 0.04"-0.05" so could still supersede the 0.81" at Cumberland.
12) *The June 1903 total of 13.87" at Bachman's Valley doesn't appear to be accepted by the National Centers for Environmental Information (NCEI).
13) In 2022, the highest CoCoRaHS Monthly totals (all in July): 13.18" at Bethesda 2.0 WNW; 11.23" at Mechanicsville 7.0 SE; Leonardtown 0.6 NE: 10.52"; Hyattsville 0.7 N: 10.43"; Birdsville 0.2 WSW: 10.42"
14) In 2023, the highest CoCoRaHS Monthly totals (all in July): 13.06" at Hurlock 1.9 SW; 11.26" at Waldorf 3.3 S; 10.88" at East New Market 1.9 SE.
15) In 2024, the highest CoCoRaHS Monthly totals (both in August): 13.39" at Damascus 1.0 S; 13.02" at Clarksburg, 2.1 NE.
In August 2024, the 0.00" reported at the Ocean City Airport is considered errata as all surrounding stations reported multiple days of measurable, even significant precipitation.
16) In 2025, the highest CoCoRaHS Monthly total was 16.11" at "Lonaconing 2.3 ESE" (Allegany County).
