UPDATED 2/18/2026

SOURCE: Applied Climate Information System (ACIS): <https://scacis.rcc-acis.org/>

- NOTES:**
- 1) Most weather data is provided for monthly, annual or seasonal periods. These data tables cover any 365-day period, showing what can occur outside of a specific year ending on December 31st.
 - 2) Official Stations are associated with the National Weather Service (NWS: WBAN and COOP), Federal Aviation Administration (FAA Airports: WBAN), and the U.S. Military Bases/Airports: WBAN.
 - 3) The Community Collaborative Rain, Hail, and Snow Network (CoCoRaHS) contains stations run mostly by general citizen observers and are not normally considered "official" by the National Weather Service (NWS) and National Centers for Environmental Information (NCEI). The veracity of this data cannot be verified beyond the CoCoRaHS observer entries and staff's review. If a potential state record is being considered and a CoCoRaHS station's data is within consideration, the various entities that make those decisions would become involved - National Weather Service, National Centers for Environmental Information, and the State Climate Extremes Committees. After interviewing the observer and reviewing the station's equipment siting, the data might then be considered official by NWS and NCEI.
 - 4) Except for a few obvious errors in the database, most of the data in these tables has not been deeply scrutinized but is presented here anyway.
 - 5) + Indicates multiple occurrences on the date shown and earlier date(s).
 - 6) When comparing stations, please note the Period of Record as some cover much longer time periods than others. A heavy precipitation period for one location might not have been captured at another, nearby location when that station was not available. The Period of Record does not necessarily mean it is a continuous record, some locations having closed then reopened at some point in the future.
 - 7) Regarding the number of missing days of data, only stations that have reported precipitation for at least a 365-day period are included. As far as CoCoRaHS stations, some show more than 200 missing days but that doesn't necessarily imply that all of those days are missing as many of those observers simply don't report when the day's report is 0.00".
