Data through 5/31/2026, Updated 6/1/2026

DATA SOURCE: 1) National Weather Service - Baltimore/Washington: <https://www.weather.gov/wrh/Climate?wfo=bx>
 2) Applied Climate Information System (ACIS): <https://scacis.rcc.acis.org/>

- NOTES: 1) This data for Baltimore includes downtown locations (1/1/1871-7/22/1950), then Friendship/Baltimore-Washington International Thurgood Marshall Airport (7/23/1950-Present).
 2) Averages are through the latest complete month, season, or year, updated only when each of those periods is completed.
 3) Values highlighted in **bold red** indicate maxima for that month, season, or year; **bold blue** values indicate minima for those periods.
 4) Cells with gray backgrounds indicate unavailable past data or future data; gray backgrounds with values indicate data not yet updated with current period.
 5) *Italic text amounts with this color background are current, incomplete totals.*

6) In July 1949, the Baltimore Custom House reported a 2-day estimated amount of 2.01" covering July 12th & 13th. The Local Climatological Data publication shows estimates parsed out as 1.97" on the 12th and 0.04" on the 13th. Upon reviewing surrounding stations, all had significant measurable precipitation on both of those days so the monthly total of 9 days can be considered proper for the Custom House.

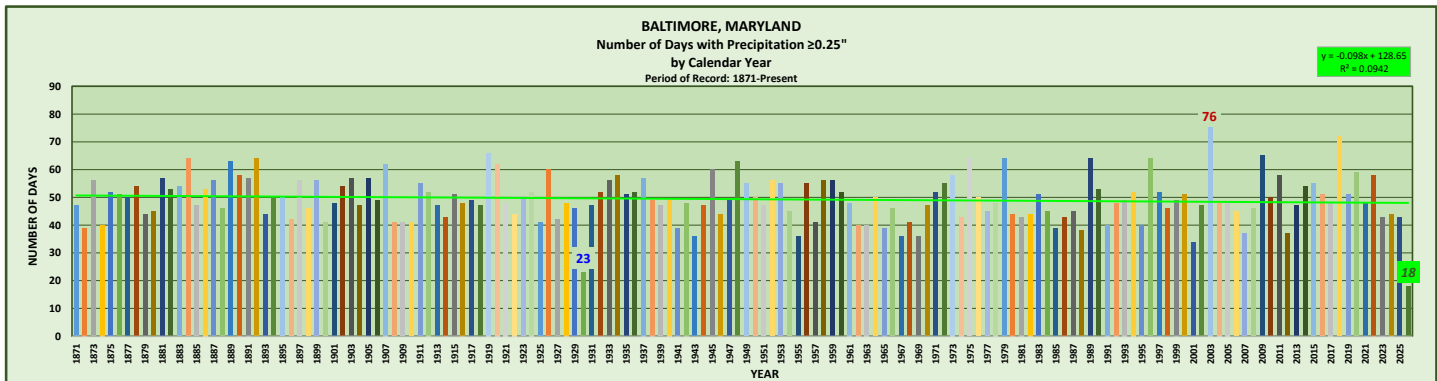

BALTIMORE, MARYLAND
Number of Days with Precipitation ≥0.25"
CALENDAR YEAR

Data through 5/31/2026, Updated 6/1/2026

DATA SOURCE: 1) National Weather Service - Baltimore/Washington: <https://www.weather.gov/wrh/Climate?wfo=bx>
2) Applied Climate Information System (ACIS): <https://scacis.rcc-acis.org/>

NOTES: 1) This data for Baltimore includes downtown locations (1/1/1871-7/22/1950), then Friendship/Baltimore-Washington International Thurgood Marshall Airport (7/23/1950-Present).

2) Averages are through the latest complete month, season, or year, updated only when each of those periods is completed.

3) Values highlighted in bold red indicate maxima for that month, season, or year; bold blue values indicate minima for seasons and years.

4) Cells with gray backgrounds indicate unavailable past data or future data; gray backgrounds with values indicate data not yet updated with current period.

5) *Italic text amounts with this color background are current, incomplete totals.*

6) In July 1949, the Baltimore Custom House reported a 2-day estimated amount of 2.01" covering July 12th & 13th. The Local Climatological Data publication shows estimates parsed out as 1.97" on the 12th and 0.04" on the 13th.

Upon reviewing surrounding stations, all had measurable precipitation on both days. Only stations also having midnight observation times were used to determine there was likely only a single day (the 12th) having a total of $\geq 1.00''$ but no amount $\geq 0.25''$ on the 13th.

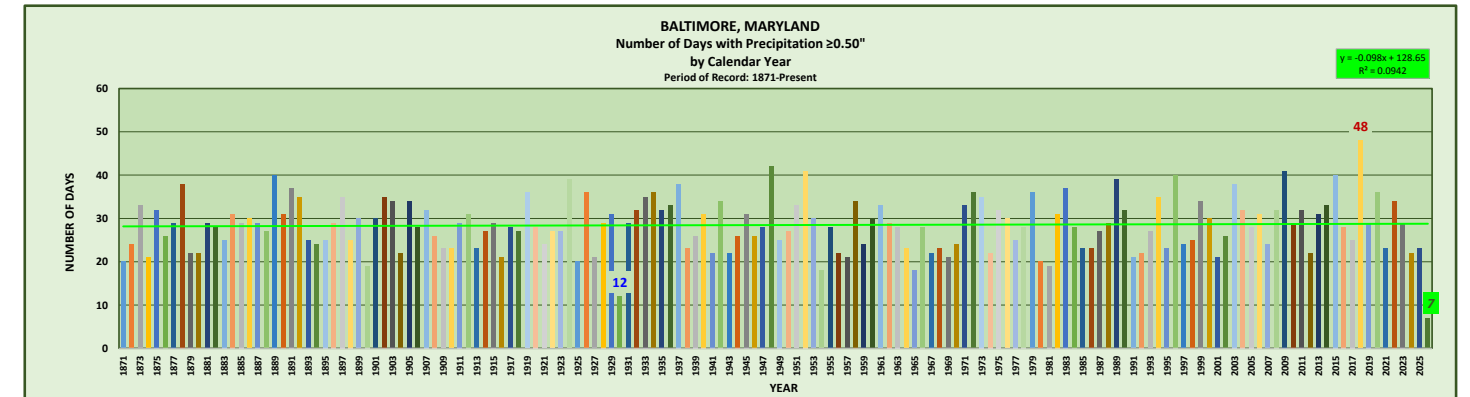

BALTIMORE, MARYLAND
Number of Days with Precipitation ≥0.50"
CALENDAR YEAR

Data through 5/31/2026, Updated 6/1/2026

DATA SOURCE: 1) National Weather Service - Baltimore/Washington: <https://www.weather.gov/wrh/Climate?wfo=bx>
2) Applied Climate Information System (ACIS): <https://scacis.rcc-acis.org/>

NOTES: 1) This data for Baltimore includes downtown locations (1/1/1871-7/22/1950), then Friendship/Baltimore-Washington International Thurgood Marshall Airport (7/23/1950-Present).

2) Averages are through the latest complete month, season, or year, updated only when each of those periods is completed.

3) Values highlighted in bold red indicate maxima for that month, season, or year; bold blue values indicate minima for seasons and years. Due to the many zeros in the monthly category, only the seasons and years contain the minima.

4) Cells with gray backgrounds indicate unavailable past data or future data; gray backgrounds with values indicate data not yet updated with current period.

5) *Italic text* amounts with this color background are current, incomplete totals.

6) In July 1949, the Baltimore Custom House reported a 2-day estimated amount of 2.01" covering July 12th & 13th. The Local Climatological Data publication shows estimates parsed out as 1.97" on the 12th and 0.04" on the 13th.

Upon reviewing surrounding stations, all had measurable precipitation on both days. Only stations also having midnight observation times were used to determine there was likely only a single day (the 12th) having a total of ≥1.00" but no amount ≥0.50" on the 13th.

BALTIMORE, MARYLAND
Number of Days with Precipitation ≥1.00"
CALENDAR YEAR

Period of Record: 1871-Present

Data through 5/31/2026, Updated 6/1/2026

DATA SOURCE: 1) National Weather Service - Baltimore/Washington: <https://www.weather.gov/wrh/Climate?wfo=bxw>
2) Applied Climate Information System (ACIS): <https://scacis.rcc-acis.org/>

NOTES: 1) This data for Baltimore includes downtown locations (1/1/1871-7/22/1950), then Friendship/Baltimore-Washington International Thurgood Marshall Airport (7/23/1950-Present).
2) Averages are through the latest complete month, season, or year, updated only when each of those periods is completed.
3) Values highlighted in bold red indicate maxima for that month, season, or year; bold blue values indicate minima for seasons and years. Due to the many zeros in the monthly category, only the seasons and years contain the minima.
4) Cells with gray backgrounds indicate unavailable past data or future data; gray backgrounds with values indicate data not yet updated with current period.
5) *Italic text amounts with this color background are current, incomplete totals.*
6) In July 1949, the Baltimore Custom House reported a 2-day estimated amount of 2.01" covering July 12th & 13th. The Local Climatological Data publication shows estimates parsed out as 1.97" on the 12th and 0.04" on the 13th. Upon reviewing surrounding stations, all had measurable precipitation on both of those days. Only the stations also having midnight observation times were used to determine there was likely only a single day (the 12th) having a total of ≥1.00".

STATION LOCATIONS	PERIODS OF RECORD
South & Water Streets (SW Corner) - Fireman's Insurance Bldg	12/23/1870-12/31/1888
Holliday & E Baltimore Streets (SW Corner) - Neal Office Bldg	1/1/1889-5/31/1891
W Monument St & Linden Ave (NW Corner) - Johns Hopkins University Physics Lab	6/1/1891-9/6/1895
N Calvert & E Fayette Streets (SW Corner) - Equitable Building	9/7/1895-7/31/1896
532 N Howard Street - Johns Hopkins University Treasurer's Bldg	8/1/1896-12/31/1907
S Gay & Water Streets - Custom House	1/1/1908-7/22/1950
Baltimore-Washington International Thurgood Marshall Airport (BWI, formerly Friendship International Airport)	7/23/1950-Present

STATION DATA SOURCE: 1) NOAA, NCDC, "Local Climatological Data, Baltimore, MD Friendship Int'l AP," 1955;
2) NOAA, NCDC, "Local Climatological Data, Baltimore, MD Custom House," 1949 & 1964;
3) NOAA, NCDC, "2012 Local Climatological Data, Annual Summary, Baltimore, MD, KBWI."

STATION NOTES: 1) 8" rain gauge through entire period.
2) Additionally, a tipping bucket rain gauge was added 6/13/1897.
3) The Automated Surface Observing System (ASOS) was commissioned at BWI on 4/1/1996.
