Data through 5/31/2026, Updated 6/1/2026

- DATA SOURCE: 1) NOAA, NCDC Local Climatological Data/U.S. Dept. of Agriculture, Weather Bureau, "Monthly Meteorological Summary, Baltimore, MD" (numerous months).
 2) NOAA, NCDC Maryland/Delaware Climatological Data/U.S. Dept. of Agriculture, Weather Bureau (numerous months).
 3) NOAA, National Weather Service: Baltimore-Washington, Sterling, VA website: <https://www.weather.gov/lwx/bwimne>
 4) Applied Climate Information System (ACIS) database website: <https://scacis.rcc-acis.org/>

- NOTES: 1) [®] Current Baltimore snowfall data dates back to 7/1883. Most Daily records are not available for review for period 1883-1892. Sources utilized: NWS-Sterling "Normals, Means, & Extremes" data, available Local Climatological Data and Maryland/Delaware Climatological Data pubs, NWS's NOW data, and the ACIS database.
 2) * Calendar-Day value.
 3) † 24-Hr Amount, where it can be determined.
 4) + additional October Trace amounts have occurred in previous years, including 10/30/1954, 10/29/1952, 10/20/1952, 10/27/1934, 10/25/1930, 10/29/1929, 10/10/1925, 10/30/1917, 10/9/1903, 10/9/1895, 10/19/1890, 10/23/1889 but are too numerous to include in the table.
 5) *italicized values* are ties, with the most recent date at the higher rank.
 6) Baltimore's Greatest Snowstorm Totals: 29.2* (2-day period 1/22-23/2016), 28.2* (4-day period 2/15-18/2003), 26.5* (3-day period 1/27-29/1922).
 7) The 2- and 3-Day Extremes cover those periods whether Snowfall occurred on all of those days or not (as when a single-day amount supersedes Snowfall occurring on all 2 or 3 days from other events). The date shown is usually the final day that any Snowfall occurred. If a duplicate amount occurs for the same event, only one of those dates is portrayed in this table.
 8) The 24-hour amount of 16.0" ending on 2/6/2010, as reported in the Local Climatological Data publication for Baltimore (BWI) by the National Centers for Environmental Information (NCEI), was likely much higher but the publication does not parse out the amount that fell beginning on 2/5/2010 (the heaviest Snow Water Equivalent (SWE) occurred on either side of midnight). The first hourly measurable Precipitation/Snowfall on 2/5/2010 was recorded at 3:00 PM and, by midnight, 9.0" of Snow had fallen. The measurable Snowfall continued hourly until 4:00 PM on 2/6/2010 with a daily total of 16.0". As there were only 2 hours of minor accumulation overlapping these two time periods, nearly all of the 2-day total of 25.0" would have fallen within 24 hours. Because an exact amount cannot be determined, only the 16.0" daily amount is retained for these tables.

STATION LOCATIONS	PERIOD OF RECORD
South & Water Streets (SW Corner) - Fireman's Insurance Bldg	7/1/1883 - 12/31/1888
Holiday & E Baltimore Streets (SW Corner) - Neal Office Bldg	1/1/1889 - 5/31/1891
W Monument St & Linden Ave (NW Corner) - Johns Hopkins Univ Physics Lab	6/1/1891 - 9/6/1895
N Calvert & E Fayette Streets (SW Corner) - Equitable Building	9/7/1895 - 7/31/1896
532 N Howard Street - Johns Hopkins Univ Treasurer's Bldg	8/1/1896 - 12/31/1907
S Gay & Water Streets - Custom House	1/1/1908 - 7/22/1950
Baltimore-Washington (Friendship) International Thurgood Marshall Airport	7/23/1950 - Present
